

Sanesh Kumar

(sanesh7644@gmail.com) | +91-7644967283 | linkedin.com/in/sanesh7644 | github.com/Sanesh764

SKILLS

Languages: C++, JavaScript (ES6+), SQL
Frontend: React.js, HTML5, CSS3, Tailwind CSS, Bootstrap, EJS
Backend: Node.js, Express.js, RESTful APIs, Socket.io
Databases: MongoDB, MongoDB Atlas, Mongoose, NoSQL Schema Design
Auth/Security: JWT, Passport.js, BCrypt, RBAC, Session Management
DevOps/Cloud: Docker, GitHub Actions (CI/CD), AWS EC2, AWS S3, Cloudinary, Render
Tools: Git, Postman, Vite, Mapbox, Jest, Supertest
Architecture: MVC, Middleware Design, Server-side Validation (Joi), RESTful Routing
DSA: 200+ LeetCode problems — Arrays, DP, Graphs, Trees, Greedy, Backtracking

PROFESSIONAL EXPERIENCE

Maincrafts Technology

Full Stack Developer Intern

Remote | 2026

- Engineered RESTful APIs in Node.js/Express.js with JWT authentication and RBAC, eliminating unauthorized access incidents across all tested environments.
- Optimized MongoDB schemas with Mongoose indexing strategies, reducing average API response time by **20%** under load testing conditions.
- Deployed production applications via Docker on Render, creating reproducible environments that eliminated deployment-related bugs across dev, staging, and production.
- Implemented session management and Joi-based middleware validation, reducing invalid request errors by **30%** and improving overall data integrity.

PROJECTS

Wanderlust — Full-Stack Vacation Rental Platform

Node.js · Express.js · MongoDB · Passport.js · Cloudinary ·

Mapbox

- Built a production-ready Airbnb-inspired rental platform serving **100+ active users** with full CRUD workflows for listings and reviews using MVC architecture.
- Implemented secure authentication via Passport.js with session-based RBAC, restricting listing and review modifications to verified owners only.
- Integrated Cloudinary for cloud image storage and Mapbox for geolocation-based property discovery via interactive map-driven UI.
- Enforced data integrity across all API endpoints using Joi schema validation and custom Express middleware before every database write.

EcoRecycle — Full-Stack E-Waste Management Platform

Node.js · Express.js · MongoDB · Docker · Jest · GitHub

Actions

- Architected a full-stack MVC e-waste management platform with BCrypt-hashed authentication and session-based state persistence.
- Achieved **90%+ code coverage** with Jest and Supertest across unit, integration, and API-level test suites.
- Delivered zero-downtime deployments on AWS EC2 via Docker containerization and GitHub Actions CI/CD pipeline automating build, test, and deploy on every push to main.
- Applied Mongoose indexing on high-frequency query fields, cutting average API response time by **20%** under simulated load conditions.

EDUCATION

Government Engineering College, Lakhisarai

B.Tech in Computer Science and Engineering

Bihar, India | 2023 – 2027

CGPA: 8.2 / 10.0

ACHIEVEMENTS

- Google H2S Solution Challenge (Under-30 Cohort):** Selected from a competitive national pool for demonstrating innovation and real-world problem-solving through technology.
- LeetCode:** Solved 200+ DSA problems covering arrays, dynamic programming, graphs, trees, greedy, and backtracking.
